of UPMC Presbyterian Hospital

JARZYNKJA JR, RICHARD Patient ID: 00095180

Program:	WPIC/ER/PEIS/7926
Service Date:	09/28/2010 07:54 PM
Start Time :	09/29/2010 12:10am
Service:	DEC Full Evaluation
Note Type:	SUPPLEMENTAL NOTE
Service Provided by:	Vered Birmaher, MD

Pt became upset about being in the DEC and having to wait for evaluation. He began to kick the door and required restraint briefly to help him maintain calm. He was taken to the seclusion room where he calmed further. Reported feeling akathisia that he attributes to Lamictal and is upset that his outpt psychiatrist does not change the medication. He was offered ativan to help him calm down and to help with akathisia but pt asked for Motrin 800mg as he reports this has helped him in the past. Will dispense motrin and continue to monitor. Pt is stable for continued evaluation in the DEC.
